Education

Université Paris-Saclay, CentraleSupélec

Mastère Spécialisé® Intelligence Artificielle de Confiance (MS IAC)

Sep 2026 – Sep 2027

Paris-Saclay, France

Galatasaray University

B.Sc. in Computer Engineering

2021 – 2026

Istanbul, Türkiye

Research Experience

Multilingual Neural News Summarization

Galatasaray University — Manuscript in preparation

2025 – Present

- Fine-tuned mBART-50 for abstractive news summarization across 15 languages using PyTorch and Hugging Face Transformers; trained a resampled variant on 818K+ examples from XL-Sum.
- Built multilingual evaluation pipelines for 52K+ test samples across 11 languages, using ROUGE, BLEU and generation diagnostics to compare training variants and language-balancing strategies.
- Developed samurAI, an end-to-end multilingual news system with RSS ingestion, local Transformer inference, SQLite persistence, Flask UI/API, and reproducible evaluation notebooks; published model checkpoints on Hugging Face.
- Preparing a research manuscript with faculty supervision for submission to *Language Resources and Evaluation (Springer Nature)*.

Selected AI Engineering & Open-Source Projects

Bir — LLM Evaluation, Tracing & Observability | [PyPI: bir-sdk](#)

- Developed a local-first [Python SDK](#) for tracing and evaluating LLM applications, covering traces, spans, generations, tool calls, retrievals, scores and experiment workflows with zero mandatory runtime dependencies.
- Built supporting observability infrastructure with a FastAPI ingestion service and Next.js dashboard for inspecting traces and experiments; added typed interfaces, tests, CI workflows and optional OpenTelemetry/OTLP export.
- Designed for framework/provider interoperability, with instrumentation patterns for modern LLM application stacks and reproducible evaluation workflows. Related repositories are available under [bir-ai on GitHub](#).

Published models are available on [Hugging Face](#), and additional projects can be explored on [GitHub](#).

Industry Experience

Borusan Boru — Software Developer Intern

Jul 2025 – Sep 2025

- Worked across ERP/MES systems, web development, information security, database management and network administration.

Digiturk / beIN Media Group — Network Intern

Jul 2024 – Aug 2024

- Configured VLANs, supported switch/router troubleshooting and monitored network traffic as part of the network team.

Technical Skills

ML / Research: Python, PyTorch, Transformers, Hugging Face, multilingual NLP, seq2seq models, model evaluation, scikit-learn, NumPy, pandas

LLM / Systems: LLM evaluation, tracing & observability, retrieval instrumentation, FastAPI, Flask, REST APIs, OpenTelemetry

Engineering: Git, Linux, Docker, SQL, testing, CI/CD, Bash; C, C++, Java

Languages: Turkish (native), French (DELF B2), English (professional working proficiency)
